

Nordenstrom Construction  
Box 90  
Mora, MN 55051

Attn: Dave Nordensrom

May 21, 2004

Dear Mr. Dave Nordenstrom,

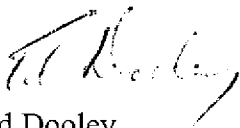

In March of 2000 my wife and I began looking for a contractor to build a house on our Rush Lake property. At the time we were told by other contractors, "we can't do this, we can't do that, the lot is too small, you need to replace the septic system, etc."

Fortunately, we contacted you at Nordenstrom Construction in Mora around September of 2001. You met us at our cabin to look over our lot and discuss various ideas and told us we probably would not have to replace our septic system, (we saved \$10,000), and proceeded to lay out a lot plan for presentation to the County Board along with names and numbers of influential members. We got our variance and building permit for the Wausau Home we had selected.

Many hours were spent with us selecting various options and changes to the floor plan, even when changes were requested during construction.

We could not have been more pleased with the end result. Your construction team was very responsive not only during, but also after completion of our home to ensure we were completely satisfied. From start to finish, Nordenstrom Construction was there to alleviate much of the stress that goes along with building a new home. Thank you!

Sincerely,

Ed Dooley
